Delta Building Automation Solutions

Delta Building Automation Solutions

As a leading BA solutions provider, Delta offers the human-centric, energy-efficient, and secure IoT-based BA management platform to optimize facility operation efficiency and building performance with edge computing technology and cloud-ready capabilities. Delta's integrated building solutions seamlessly connect the building operation network to the IP-based network for extending the smart building possibilities. Further performing as a reliable green building consultant, Delta brings value-added building related services and realizes our vision "smart building for better living" for our customers worldwide.

Optimal

Enterprise-grade energy analysis and the building control system optimize the balance between energy savings and operation performance enhancement.

Secure

Smart surveillance solution secures occupants and properties by preventing incidents in advance.

Human Centric

Cognitive computing provides occupants with their preferred building environment based on users' experience, feedback and behavior analysis.

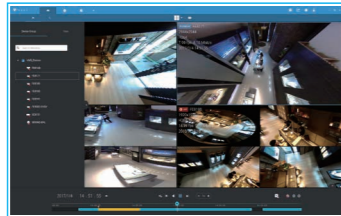

Database

3rd Party System

Cybersecurity

iBMS

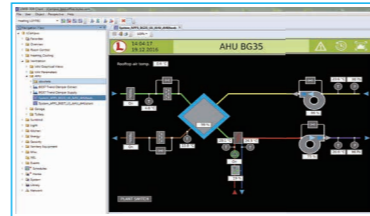

Video Management System (VAST2)

Surveillance Management System (SmartPass)

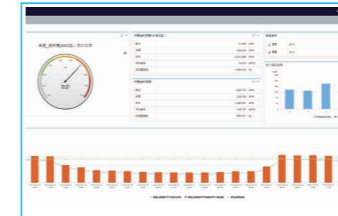

Building Management System (LWEB)

Building Management System (enteliWEB)

Energy Management System (Delta Energy Online)
