

# Greenhouse Gas Verification Statement

The inventory of Greenhouse Gas emissions in year 2022 of

## Delta Electronics, Inc.

186, Ruey Kuang Road, Neihu District,  
Taipei 114501, Taiwan

has been verified in accordance with ISO 14064-3:2006 as  
meeting the requirements of

## ISO 14064-1:2018

Direct emissions

**38,806.8541** tonnes of CO<sub>2</sub>e

Indirect emissions

**5,118,048.6325** tonnes of CO<sub>2</sub>e

Direct emissions and indirect emissions

**5,156,855.487** tonnes of CO<sub>2</sub>e

Authorized by

Stephen Pao

Knowledge Deputy General Manager

Date: 12 June 2023

Version 1

The emission of each category is described as below:

Unit: tonnes of CO<sub>2</sub>e

Reporting Boundaries		GHG Emissions		
Inventory categories	Description	Location-based	Market-based	
Direct emissions	Stationary combustion emissions	12,576.2505		
	Mobile combustion emissions	1,954.2679		
	Industrial processes emissions	1,225.1627		
	Fugitive emissions emissions	23,051.1731		
	Land use emissions	0.0000		
Indirect emissions	Imported energy	Indirect emissions from incoming electricity	395,426.8404	148,816.9258
		Indirect emissions from other energy	20.7318	
	Transportation	Emissions from upstream transport and distribution of goods	27,279.1573	
		Emissions from downstream transport and distribution of goods	151,809.8000	
		Emissions from employee commuting	559.8626	
		Emissions from business travel	4,827.1035	
	Products used by an organization	Emissions from purchased goods	284,352.2829	
		Emissions from capital goods	2,205.6900	
		Emissions from solid and liquid waste treatment	7,223.5294	
		Emissions from Asset Use	18.7465	
	Associated with the use of products from the organization	Emission or removal during product use phase	4,240,197.0474	
		Emissions from downstream leased assets	4,127.8407	
	Other sources	Undisclosed	NA	
	Direct emissions and indirect emissions		5,156,885.487	4,910,245.572

Purchased Renewable Energy Certificate(s) Information

SGS has been contracted by Delta Electronics, Inc. (hereinafter referred to as “DELTA”), 186, Ruey Kuang Road, Neihu District, Taipei 114501, Taiwan for the verification of direct and indirect Greenhouse Gas emissions in accordance with

**ISO 14064-3:2006**

as provided by Delta Electronics, Inc. (hereinafter referred to as “DELTA”), 186, Ruey Kuang Road, Neihu District, Taipei 114501, Taiwan, in the GHG Assertion in the form of GHG report covering GHG emissions of the period 01 January 2022 to 31 December 2022.

**Roles and responsibilities**

The management of DELTA is responsible for the organization’s GHG information system, the development and maintenance of records and reporting procedures in accordance with that system, including the calculation and determination of GHG emissions information and the reported GHG emissions.

It is SGS’s responsibility to express an independent GHG verification opinion on the GHG emissions as provided in the GHG Assertion for the period 01 January 2022 to 31 December 2022.

SGS conducted a third-party verification of the provided GHG assertion against the principles of ISO 14064-1:2018, ISO 14064-3:2006 in the period 23 February 2023 to 31 March 2023. The verification was based on the verification scope, objectives and criteria as agreed between DELTA and SGS on 31 October 2022.

**Level of Assurance**

The level of assurance is limited assurance.

**Scope**

DELTA has commissioned an independent verification by SGS Taiwan of reported GHG emissions of DELTA arising from design and manufacture of optical transceiver and broadband modules activities, design and manufacture of Network switches, VoIP and wireless LAN devices, design and manufacture of lithium battery, design and manufacture of power supply, factory system rental service activities, to establish conformance with ISO 14064:2018 principles within the scope of the verification as outlined below.

This engagement covers verification of emission from anthropogenic sources of greenhouse gases included within the organization’s boundary and is based on ISO 14064-3:2006.

- Title or description activities: GHG verification for DELTA in year 2022.
- Location/boundary of the activities: See appendix list.
- Physical infrastructure, activities, technologies and processes of the organization: Design and manufacture of optical transceiver and broadband modules activities, design and manufacture of Network switches, VoIP and wireless LAN devices, design and manufacture of lithium battery, design and manufacture of power supply, factory system rental service.
- GHG sources, sinks and/or reservoirs included: Sources as presented in the inventory spreadsheet provided by DELTA.
- Types of GHGs included: CO<sub>2</sub>, CH<sub>4</sub>, N<sub>2</sub>O, HFCs, PFCs, SF<sub>6</sub>, NF<sub>3</sub>
- The IPCC 2013 AR5 GWP values are applied in this inventory.
- Emission factor:
  - Direct emissions: Greenhouse Gas Emission Factor Table (6.0.4), EPA.
  - Indirect emissions:
    - Electricity emission factor:

Region		Electricity emission factor (kgCO <sub>2e</sub> /kWh)	Source

- The secondary database has Carbon Footprint Information Platform, Ecoinvent 3.0, ICAO Carbon Emissions Calculator.
- Directed actions: NA
- GHG information for the following period was verified: 01 January 2022 to 31 December 2022
- The version of inventory sheet: 12 May 2023
- The version of GHG assertion: 12 May 2023
- Intended user of the verification statement: Private

**Objective**

The purposes of this verification exercise are, by review of objective evidence, to independently review:

- Whether the GHG emissions are as declared by the organization’s GHG assertion
- The data reported are accurate, complete, consistent, transparent and free of material error or omission.

**Criteria**

Criteria against which the verification assessment is undertaken are the principles of ISO 14064-1:2018.

**Materiality**

The materiality required of the verification was considered by SGS to 5%, based on the needs of the intended user of the GHG Assertion.

**Conclusion**

DELTA provided the GHG assertion based on the requirements of ISO 14064-1: 2018. The GHG information for the period 01 January 2022 to 31 December 2022 disclosing emissions of 5,156,855.487 metric tonnes of CO<sub>2</sub> equivalent and 0.0000 metric tonnes of direct CO<sub>2</sub> emissions from the combustion of biomass are verified by SGS to a reasonable level of assurance, consistent with the agreed verification scope, objectives and criteria.

The emission of each category is described as below:

Unit: tonnes of CO<sub>2</sub>e

Reporting Boundaries		GHG Emissions		
Inventory categories	Description	Location-based	Market-based	
Direct emissions	Stationary combustion emissions	12,576.2505		
	Mobile combustion emissions	1,954.2679		
	Industrial processes emissions	1,225.1627		
	Fugitive emissions emissions	23,051.1731		
	Land use emissions	0.0000		
Indirect emissions	Imported energy	Indirect emissions from incoming electricity	395,426.8404	148,816.9258
		Indirect emissions from other energy	20.7318	

Statement TW23/00225GG, continued

Reporting Boundaries		GHG Emissions	
Inventory categories	Description	Location-based	Market-based

SGS's approach is risk-based, drawing on an understanding of the risks associated with reporting GHG emissions information and the controls in place to mitigate these. Our examination includes assessment, on a test basis, of evidence relevant to the amounts and disclosures in relation to the organization's reported GHG emissions.

We planned and performed our work to obtain the information, explanations, and evidence that we considered necessary to provide a reasonable level of assurance that the GHG emissions of category 1 and category 2, and limited level of assurance of category 3 till category 6 for the period 01 January 2022 to 31 December 2022 are fairly stated.

We conducted our verification with regard to the GHG assertion of DELTA which included assessment of GHG information system, monitoring and reporting plan/protocol. This assessment included the collection of evidence supporting the reported data, and checking whether the provisions of the protocol reference, were consistently and appropriately applied.

In SGS's opinion the presented GHG assertion

- is materially correct and is a fair representation of the GHG data and information, and
- is prepared in accordance with ISO14064-1:2018 on GHG quantification, monitoring and reporting.

**Confidentiality**

The reports and attachments may contain relevantly confidential information of the clients. In addition to being submitted as governmental application or certification documents, the reports and attachments are not allowed to be edited, duplicated, or published without the clients' agreement in written form.

**Avoidance of Conflict of Interest**

The reports and attachments are completely complied with the standards and procedures that related authorities established. The reports and attachments of auditing process are conduct with fairness and honesty. If not, the auditing institution not only has to bear the relevant compensation duties, but also to receive legal charge and punishment.

This statement shall be interpreted with the GHG assertion of DELTA as a whole.

**Verifier Group**

Above statements coincide with auditing process with fairness and impartiality and aim at the emission of year 2022 of clients.
