

ISO 27001 Information Security Management System Certification

Governance Structure

Delta Group has a Chief Information Security Officer (CISO), who is the highest ranking person in charge of information security. The CISO is responsible for supervising the execution of company-wide information security operations, ensuring the effectiveness of information security risk management mechanisms. Regarding information security and personal information management, Delta established the "ISMS and PIMS Steering Committee", convened by the CISO and CHRO, in order to effectively discuss and identify information security and personal information issues and related risks. To ensure that Delta Group's information security management can continue to operate effectively, Delta established the "Information Security Steering Committee". The Committee is chaired by the CEO, with CISO as the convener. The COO, senior executives from business groups around the world, and regional senior executives are all committee members. They discuss the information security issues and business needs of different regions and determine required resources and action plans.

Management Mechanism

- **Operational Model:** Delta Group has established an information security management system. The system contains the roles and responsibilities of information security organization, personnel education and training, and the management of computer hardware and software, networks and physical environments. To ensure the confidentiality, integrity, and availability of Delta's information security assets and prevent them from being damaged intentionally or negligently by internal or external threats.
- **Reporting Frequency:** The CISO reports the overall information security implementation status and effectiveness to the Board annually. This ensures that information security policies and controls are implemented at Delta Group's business groups worldwide. The "ISMS and PIMS Steering Committee" holds regular meetings every year. "Information Security Steering Committee" holds regular meetings every quarter.
- **Implementation:** To continuously ensure the implementation of information security and the maintenance of certificate validity, control measures are conducted annually, including asset inventories, risk assessment and treatment, business continuity plans(BCPs) for critical information systems, conducting drills per the BCPs, and internal audits.

Certification

Delta Group's information security governance structure and management mechanism have been in place since obtaining ISO 27001 certification in 2018, and further updated with ISO 27001:2022 certification in 2024.

Certificate TW18/00601.00
