

Delta Electronics Climate Action and Policy Influence in 2024

Delta's Net-Zero Commitment

Delta Electronics is concerned about policies that have a positive impact on the development of the domestic community, environmental protection, climate change, and energy conservation and support the policies that align with the goal of the Paris Agreement. If necessary, Delta will actively seek to influence policy amendments that are in line with the Paris Agreement through lobbying, making public statements, associations, mass media, forums, seminars, visits, business dealings or other due process.

As our corporate mission is: “To provide innovative, clean, and energy-efficient solutions for a better tomorrow”, Delta participates in environmental-related initiatives, and selected associations that share the same vision to develop business opportunities that benefit society and the environment.

In 2024, the total contributions are 540,533USD. Our largest contributions go to organizations and topics such as “smart and low-carbon technology development and innovation”, which accounts for 380,227 USD, and “net-zero emissions and environmental sustainability”, which accounts for 64,639 USD. We join meetings/webinars/seminars hosted by these associations, and shared our experience with other members, or the public. We are a Gold Member of RE100 and a member of EV100 initiatives led by the Climate Group, a founding member of Taiwan Climate Partnership, a regular member of International WELL Building Institute, Committee on Social Responsibility of the Chinese Electronics Standardization Association, and the Business Council for Sustainable Development of Taiwan.

Delta has also become a member of several associations to contribute to standard settings and technology information sharing while getting access to the latest standards, participating in task forces, downloading the latest specifications, and receiving qualifications. Participating in these associations will help Delta maintain its R&D competence and ensure leading performance in the future. Relevant organizations include the IOWN Global Forum, Linux Foundation, Taiwan Optoelectronic Semiconductor Industry Association, Chinese Association of Automation, China Communications Standards Association, China Motion Control Industry Alliance, and Cloud Computing and IoT Association in Taiwan.

Delta understands that companies have a certain influence on policy, industry, and social development. The Delta Group Policy Influence Guidelines are formulated. Please refer to the [link here](#) for detailed information. We are also aware that the public is increasingly concerned about corporate participation in associations, lobbying, charitable donations, and politics. The Guidelines establish a clear management system for policy engagement and association activities. All policy and lobbying positions must be reported annually to the management team to ensure alignment with the company’s philosophy and the goals of the Paris Agreement. Participation in associations and lobbying must be regularly reviewed, and if misaligned with Delta’s philosophy or the Paris Agreement, Delta will seek to influence changes, otherwise issue public clarification or leave the association. We disclose the total monetary contributions to and spending for political campaigns, political organizations, lobbyists or lobbying organizations, trade associations and other tax-exempt groups every year.

In April 2024, Taiwan's Ministry of Environment releases 3 drafts of the carbon fee regulations. Delta provided recommendations for the carbon fee system, aiming to align with international carbon pricing frameworks and effectively drive substantial carbon reduction. The recommendations also mention that the revenue from carbon fees be earmarked exclusively for carbon reduction initiatives, in line with Delta’s internal carbon pricing mechanism, net-zero commitments and the goals of the Paris Agreement.

Total Contributions and Spending

Item (USD)	2021	2022	2023	2024
Lobbying, interest representation or similar	0	0	0	0
Local, regional or national political campaigns / organizations / candidates	0	0	0	0
Trade associations or tax-exempt groups (e.g. think tanks)	281,264	554,746	691,543	540,533
Other (e.g. spending related to ballot measures or referendums)	0	0	0	0
