

Intellectual Property Management Policy

Delta Electronics is committed to the research and development of advanced technologies, and the enhancement of product competitiveness. In order to protect research and development results and reduce operational risks, the following intellectual property management policies have been established:

- Strengthening worldwide patent portfolio;
- Implementing intellectual property document confidentiality management;
- Strengthening the measures of intellectual property management for current employees, departed employees and retired employees;
- Enhancing employees' patent knowledge and capabilities;
- Optimizing patent data management.
