

Delta Policy Influence in 2022

Delta Electronics is concerned about policies that have a positive impact on the development of the domestic community, environmental protection, climate change, and energy conservation and support the policies that align with the goal of the Paris Agreement. If necessary, Delta will actively seek to influence policy amendments that are in line with the Paris Agreement through lobbying, making public statements, associations, mass media, forums, seminars, visits, business dealings or other due process.

As our corporate mission is: “To provide innovative, clean, and energy-efficient solutions for a better tomorrow”, Delta participates in environmental-related initiatives, and selected associations that share the same vision to develop business opportunities that benefit society and the environment. In 2022, the total contributions are 554,746 USD our largest contributions go to organizations and topics such as “smart and low-carbon technology development and innovation”, which accounts for 86,774 USD, and “net-zero emissions and environmental sustainability”, which accounts for 420,023 USD. We join meetings/webinars/seminars hosted by these associations, and shared our experience with other members, or the public. We are a Gold member of RE100 and a member of EV100 initiatives led by the Climate Group, a founding member of Taiwan Climate Partnership, a regular member of International WELL Building Institute, Committee on Social Responsibility of the Chinese Electronics Standardization Association, U.S. Green Building Council (USGBC) and the Business Council for Sustainable Development of Taiwan.

Delta has also become a member of several associations to contribute to standard settings and technology information sharing while getting access to the latest standards, participating in task forces, downloading the latest specifications, and receiving qualifications. Participating in these associations will help Delta maintain its R&D competence, and ensure leading performance in the future. Relevant organizations include the IOWN Global Forum, Linux Foundation, Taiwan Optoelectronic Semiconductor Industry Association, Chinese Association of Automation, China Communications Standards Association, China Motion Control Industry Alliance, and Cloud Computing and IoT Association in Taiwan.
